**ENO**  
Environment Online

**Welcome to participate with other ENO schools around the world to flowerbomb -event!**

Flower- or seedbomb is a horticultural activity: little balls made up of a combination of compost, clay and seeds. They're not explosive or edible and the idea is to spread flowers in different environments with a try to work in harmony with nature. Skilfully thrown, they make grey cities a little more colourful, but are also suitable for the home flower pot or garden. **The important thing is to use native seed plants that are naturally grown in your area!**

## **GETTING READY!**

The ENO network's flowerbombing day is 13 May. There are two steps:

**DAY 1: Preparation of seedbombs**

**DAY 2: Flowerbombing outside**

There are a lot of instructions on the internet on how you can prepare your flowerbombs. You can follow for example these instructions:

<https://www.wildlifetrusts.org/actions/how-make-seed-bomb>

<https://www.wikihow.com/Make-a-Seed-Bomb>

There are also great variety a video instructions available:

<https://www.youtube.com/watch?v=hURzGJZVLis>

<https://www.youtube.com/watch?v=3tt1QrVTefo>

**A Tip to ENO Network:** If you wrap the seed bombs into a package made of newspaper etc. you can also sell them with students around your schools and get funding for the tree seedlings or for the victims of war for example.
